Manufacturers Price Data

Dragon2000 currently process price updates for most manufacturers price files, and allows you to add items to your parts stock using the manufacturers price information.

Links to Other Applications

Users of Sage Line 50 will find, with the addition of our Sage Integration Module, that all financial transactions, including recording payments received, are mirrored in Sage.

Screens/User Interface

Dragon2000 Version 9 has a fresh, clear interface. Input from our users has enabled us to create the most intuitive and logical layout. Even those who have never touched a computer before should find that they have no problem understanding and getting the most out of the system.

Recommended System Requirements

Dragon2000 can be installed on any **cabled** Microsoft Windows Network (wireless networks are not recommended). A specialist server is not required, but can be accommodated if you have one. The minimum specification of each computer is 1.5Ghz Pentium 4 or Athlon XP, 500MB Hard Disk Space, CD-ROM drive, A4 printer.

Windows 2000: 256 Mb RAM; Windows 2003 or XP Professional: 512Mb RAM; Windows Vista: 1Gb RAM

Support

Telephone and email support is available from as little as £34.95 per month. All Dragon2000 software is supplied with 30 days free technical support, including all system updates **FREE OF CHARGE**.
